Hi Eligio,

I noticed you haven't registered for tomorrow's webinar, but there's still time! Join us at 2 PM ET / 11 AM PT for The Case for LPR + Gunshot Detection.

Our discussion will feature an in-depth look at how big and small agencies can use scalable LPR and gunshot detection devices in tandem for faster response times and increased case clearance. There will also be a live Q&A at the end if you have a question on something specific.

You can save your spot here.

I am looking forward to seeing you there!

Maureen Mulvaney
Director of Product Marketing
